8B  
D7  
12. A food bar divided into segments corresponding to plural courses of a meal, including:

(a) a first segment which includes one or more appetite stimulants, and

(b) a second segment which includes one or more appetite depressants, whereby

the food bar provides improved physiological and psychological support for the consumer.

R'  
sub C45  
13. The food bar of claim 12, further comprising:

(c) at least one lengthwise divider for each segment to divide the bar into strips which are selectable for predetermined calories, whereby

the food bar provides further improved physiological and psychological support for the consumer.

14. A meal-equivalent food bar divided into segments corresponding to plural courses of a meal, including:

(a) a first segment equivalent to appetizer;

(b) a second segment equivalent to main-course; and

(c) a third segment equivalent to dessert, whereby
